

Venofer (VF) Fee Policy

Venofer (VF) is an iron medication that is covered by your health insurance plan, but the reimbursement is not enough to cover the cost of the medication and the services required to infuse. As a result, we require a \$100 VF fee to do the infusion. We do this to avoid charging full price for this medication.

Unfortunately, because this is the preferred iron on your health plan, we are unable to request an alternative medication until you have tried Venofer first.

This office fee is assessed by the Susan Fox DO PA due to the under-reimbursement by your health plan. It is not billable to your health insurance plan. When you contact the health plan, the health plan understands the need to charge this office fee because their coverage is insufficient. The fee must be paid prior to the infusion.

We know this is not easy, but we are certain that it will be a challenge to obtain this medication in any other center.

You may choose to look for another center to receive your iron infusions. We advise you not to do this if your iron infusion is considered urgent, because it is likely to cause you a delay.

Signing this form acknowledges that you understand our VF policy, and that you agree to pay the \$100 VF fee required for each VF iron infusion.
